Questionnaire for the User Study

1. Please indicate your persona number

2. Please indicate if you (not persona) have any of the listed vision deficiencies.

3. Please indicate your scenario number

4. **Brightness**: Users can set the background colour and the text colour from the full colour spectrum.

5. **Colour**: Colour is not the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.

6. **Rewrap**: Blocks of text rewrap so that only one direction of scrolling is needed, e.g., for left-right and right-left scripts (languages), usually vertical scrolling and not horizontal scrolling.

7. **Reflow**: Users can set blocks of text in one continuous block, instead of in multiple columns

8. **Line Length**: Users can set the line length for blocks of text. Often the easiest way to do this (for developers, designers, and users) is for users to resize text areas and the text rewraps to change the line length.

9. **Hyphenation**: Users can turn hyphenation on or off.

10. **Text Size**: Users can change the text size (font size) of all text, without zooming the entire interface.

11. **Font**: Users can change the font face (also called font family or typeface) of all text, choosing from a wide range of fonts including sans serif and serif fonts.

12. **Style**: Users can change the text style (underline, italic, bold) of blocks of text.

13. **Capitalisation**: Users can change the capitalisation (all capital letters, small capital letters, sentence style) of blocks of text.

14. **Size**: Users can change the size of all elements.

15. **Line Spacing**: Users can change the line spacing (leading) for blocks of text.

16. **Letter Spacing**: Users can change the letter spacing (space between letters/characters) of blocks of text.

17. **Word Spacing**: Users can change the word spacing (space between words) of blocks of text.

18. **Justification**: Users can change the justification / alignment (left, right, full/both, centred) of blocks of text.

19. **Margins and Borders**: Users can change the margins (blank space) and borders (including colour, width, style) around blocks of text.

20. **Spacing Between Elements**: Spacing groups related elements and separates less related elements.

21. **Element-level Customization**: Users can customize text differently for specific elements. Users can set at least: Text size, Text colour and background colour, Font, Text style, Line spacing, Margins, Borders.

22. **Point of Regard**: The view remains visible within the application when the window is resized, when content is zoomed or scaled, or when content formatting is changed

23. **Related Information**: Users know about and can find related information.

24. **All Elements**: Users can see all interface elements that are intended for users to see, including when users have changed display settings such as text size

25. **Printing**: Users can print content after customizing how the text is displayed.
